<p>Notes: ¹ Bike Lane (Conversion) = Roadway requires a reduction in vehicle lanes to add bicycle lanes (typically a reduction from two travel lanes in each direction to one travel lane in each direction with a two-way left-turn lane and bicycle lanes)</p> <p>Climbing Lane/Sharrows = Bicycle lane on uphill side of roadway with Sharrows on downhill side of roadway</p> <p>One-Way Bike Lane = Bicycle lane on a one-way street, bicycle lanes are only needed on one side of the roadway</p> <p>Contra-Flow Bike Lane = Bicycle lane on a one-way street with bicycles traveling in the opposite direction of vehicle traffic</p> <p>Directional (i.e. EB, WB, NB, SB) Bike Lane = Bicycle on one side of the street only</p> <p>² Cost estimates are based on conceptual construction cost estimates provided in Table 10 – Conceptual Unit Cost Estimates for Bikeway Construction (provided in Chapter 7 – Funding and Implementation)</p> <p>Rankings are on a scale of 1-5, with 1 representing the highest ranking (highest priority) and 5 representing the poorest ranking.</p> <p>NA=Not Available/Applicable</p> <p>Source: Fehr & Peers, 2011</p>
