TRANSIT SIGNAL PRIORITY PROJECT

- TSP modifies normal signal operation to better accommodate transit vehicles
- Early green signal and extension of green phase when bus is approaching intersection
- General timing of signal is not interrupted
- Project is currently underway

SOUTH VIRGINIA STREET TRANSIT QUEUE JUMP PROJECT

- Separate “BUS ONLY” lane allows bus to bypass the queue
- Separate bus signal allows bus to “jump” ahead of all traffic with a separate signal phase
- Construction starts in May 2010 with completion by August 2010
